Passionate and detail-oriented Software Developer more than 10 years of experience in creating efficient, scalable, and innovative software solutions. Skilled in full-stack development, problem-solving, and collaborating across teams to deliver high-quality products.

Willing to relocate: Anywhere

Authorized to work in the US for any employer

## Work Experience

---

### **Computer Systems Architect and Development**

DAXIMA SOFTWARE DEVELOPMENT GROUP - Orinda, CA

November 2014 to August 2020

- Collaborated with a team of developers to design, implement, coding , maintain and deploy a web-based application using C#.net MVC4, AngularJS , Angular , React, Node.js, PHP, jQuery, Bootstrap.
- Developed RESTful APIs to facilitate seamless communication between the front-end and back-end systems.
- Optimized database queries MSSQL & PostgreSQL resulting in a reduction in application response time.
- Implemented report features using Telerik UI and Logi Analytics (LogiXML) and SSRS.
- Participated in daily stand-up meetings and sprint planning sessions to ensure efficient project progress.

### **ERP Software Engineer**

Intellicont-content management system and consulting Part.Ltd - Chiang Mai

March 2007 to November 2010

- Developed and maintain, codes, jobs, reports of HP 3000 ERP system with HP COBOL and other tools.
- Design and Develop Stock Take system and Goods Receiving System.
- Cross-platform application solutions connecting the legacy ERP system and SQL Server, developed using ASP.NET with C#.
- Solve the problem from database ( Turbolmage ) by Supertool and PowerHouse.
- Programming and fixing the bug on the label printing for SATO printer cl408e.
- Document configurations, procedures, and troubleshooting steps for future reference and to ensure continuity when changes are needed.

### **Computer Scholar**

Information Technology Service Center, Chiang Mai University - Chiang Mai

September 2005 to February 2007

- Led a web application development team in executing projects from concept to deployment, ensuring alignment with project goals and client expectations in SDLC process.
- Collaborated closely with clients and stakeholders to understand project requirements, translating them into actionable tasks for the team.

- Established clear project timelines and milestones, ensuring tasks were completed on schedule and delivering projects ahead of deadlines on 15% of occasions.
- Fostered a collaborative work environment, encouraging knowledge sharing and cross-training within the team to enhance skill sets and improve overall team performance.
- Conducted regular team meetings to communicate project updates, provide guidance, and address any challenges, resulting in increased team cohesion and morale.
- Played a pivotal role in hiring and onboarding new team members, contributing to a smooth integration process and ensuring a high-performing team.

## **Team Leader - Web Development**

Express Data Co.,Ltd - Phuket  
November 2003 to August 2005

- Led a web development team in executing projects from concept to deployment, ensuring alignment with project goals and client expectations.
- Analysis the requirement to design the database.
- Implemented front-end designs and interacted with back-end systems to create dynamic web features using technologies like HTML, CSS, JavaScript, and PHP.
- Developing Web Application under LAMP environment ( Linux, Apache, Mysql & Php ).
- Established clear project timelines and milestones, ensuring tasks were completed on schedule and delivering projects ahead of deadlines on 15% of occasions.
- Fostered a collaborative work environment, encouraging knowledge sharing and cross-training within the team to enhance skill sets and improve overall team performance.

## **System Administrator**

YMCA Chiang Mai - Chiang Mai  
March 2003 to October 2003

- **Server Management:** install, configure, and maintain server hardware and software, ensuring that servers are properly running and optimized for performance. Handling tasks like server provisioning, monitoring, and troubleshooting on MS Windows 2000 & FreeBSD ( Unix-based ).
- **Network Administration:** This involves setting up and maintaining network infrastructure, including routers, switches, firewalls, and other network devices. manage network connectivity, security, and performance.
- **User Account Management:** create, modify, and delete user accounts, granting appropriate access permissions based on job roles.
- **Software Installation and Updates:** install, update, and configure software applications across the organization's systems. This includes operating systems, productivity software, security tools, and more.
- **Security Management:** play a critical role in maintaining the security of IT systems. Implementing security protocols, configure firewalls, apply patches, and monitor systems for vulnerabilities and unauthorized access.
- **Backup and Recovery on MS SQL Server & MySQL.**
- **Troubleshooting and Problem Resolution:** When technical issues arise, diagnose and resolve problems related to hardware, software, networks, and user accounts.
- **Performance Monitoring:** Monitoring system performance and resource utilization to identify potential bottlenecks or areas for improvement. Analyzing system logs and metrics to optimize performance.
- **Document configurations, procedures, and troubleshooting steps for future reference and to ensure continuity when changes are needed.**
- **Upgrades and Migrations:** As technology evolves, planning and execute upgrades and migrations of hardware, software, and systems to newer versions or platforms.

- Security Audits and Compliance: Security audits to ensure that systems and processes comply with industry regulations and internal security policies.
- 24/7 Monitoring and Support: It might be part of an on-call rotation to provide 24/7 support and respond to emergencies.
- Trained : Make documents, organize training and demonstrate the use of computers and systems within the organization to users.

## **Internet Cafe Manager/Owner**

Internet A pluse - Meaung, Chiang Mai

March 1995 to May 2003

- Assist customers with software-related issues and inquiries.
- Offer services such as gaming, document, printing, and downloading assistance.
- Maintain accurate records of transactions, inventories, and usage logs.
- Track customer computer/internet usage time and provide necessary reminders.
- Ensure the cleanliness and organization of the cafe at all times.
- Handle accounting tasks, including managing cash transactions and reconciling bank statements.
- Enter data into accounting databases, perform backups, and maintain financial records.
- Manage computer systems, printers, and equipment pricing for sale.
- Upgrade and replace outdated computers and equipment, ensuring the cafe stays modern and efficient.

## **Web Programmer**

Tradepointthailand.com - Chiang Mai

July 2002 to February 2003

- Design structure of web page by HTML Javascript & CSS.
- Management the Database MySQL by Store , Retrieve , Backup , Recovery , Design & Security.
- Developing Web Application under LAMP environment ( Linux, Apache, Mysql & Php ).
- Converting the legacy online system from Perl to PHP.
- Integrated front-end and backend in PHP and MySQL.
- Server Management: install, configure, and maintain server hardware and software, ensuring that servers are properly running and optimized for performance. Handling tasks like server provisioning, monitoring, and troubleshooting on Slackware ( Linux ).
- Network Administration: This involves setting up and maintaining network infrastructure, including routers, switches, firewalls, and other network devices. manage network connectivity, security, and performance.

## **System Administrator**

Payap University - Chiang Mai

June 2001 to February 2002

- Install, configure, and maintain servers and storage devices.
- Monitor server performance and ensure proper functioning of applications.
- Perform regular software updates and security patches.
- Manage network devices and troubleshoot network connectivity issues.
- Maintain and repair hardware components, such as servers, storage devices, and backup systems.
- Implement backup and disaster recovery solutions to prevent data loss.
- Implement and enforce security policies to protect data and systems.
- Monitor and respond to security incidents and breaches.
- Install and update antivirus software, firewalls, and intrusion detection systems.
- Maintain detailed records of system configurations, network layouts, and hardware inventory.

- Generate reports on system performance, security incidents, and resource utilization.
- Create and update standard operating procedures (SOPs) for various tasks and processes.
- Assist in troubleshooting hardware and software issues.
- Train employees on basic IT procedures and best practices.
- Collaborate with other IT professionals and departments on various projects.

## **Computer Technician Specialist**

DataSoft - Chiang Mai

March 1993 to July 1994

- **Hardware and Software Installation:** install and configure computer hardware components such as keyboards, hard drives, and printers also install operating systems, software applications, and drivers.
- **Troubleshooting:** When computer systems or software malfunction, technicians diagnose the issue and implement solutions. This might involve running diagnostic tests, checking for viruses, or repairing/replacing faulty hardware.
- **Data Backup and Recovery:** Technicians implement data backup strategies to prevent data loss and assist in data recovery efforts if files are accidentally deleted or lost due to hardware failures.
- **Upgrades:** assess the need for hardware or software upgrades and carry out these upgrades efficiently to enhance system performance and capabilities.

## Education

---

### **Master's degree in Computer Science**

ChiangMai University - ChiangMai , Thailand

2007 to 2009

### **Bachelor's degree in Computer Science**

Payap University - Chaing Mai

1999 to 2002

## Skills

---

- C#.net mvc4
- MSSQL
- PHP
- MySQL
- node.js (1 year)
- angularjs (2 years)
- JQuery (5 years)
- Javascript (8 years)
- Perl
- SQL Server
- SQL
- HTML
- React

- Angular 2+
- Back-end development
- Linux
- Java
- APIs
- Bootstrap
- CSS
- ASP.NET
- GitHub
- REST
- Web development
- T-SQL
- JSON
- MongoDB
- COBOL (3 years)
- Application Development
- Operating Systems
- TFS
- XML
- Apache

## Languages

---

- Thai - Fluent
- English - Intermediate

## Certifications and Licenses

---

### **Microsoft® Certified Professional Developer: Web Developer.( MCPD )**

December 2007 to Present

### **Microsoft® Certified Technology Specialist: .Net Framework 2.0, Web Applications. ( MCTS )**

December 2007 to Present

### **Microsoft Certified Application Developer: Microsoft .NET.**

June 2007 to Present

## **Microsoft Certified Professional ( MCP )**

April 2006 to Present

## **SUN Certified Programmer For The JAVA 2 Platform 1.4**

March 2006 to Present

## **CCNA**

December 2023 to December 2026

Cisco Certified Network Associate

## Assessments

---

### **Software developer fit — Proficient**

March 2023

Measures the traits that are important for successful software developers

Full results: [Proficient](#)

### **Technical support: Customer situations — Completed**

October 2023

Responding to technical support situations with sensitivity

Full results: [Completed](#)

### **Software developer fit — Proficient**

July 2021

Measures the traits that are important for successful software developers

Full results: [Proficient](#)

### **Technical support — Proficient**

October 2023

Performing software, hardware, and network operations

Full results: [Proficient](#)

### **Delivery driver — Proficient**

October 2023

Interpreting instructions or signs and solving problems

Full results: [Proficient](#)

### **Work motivation — Proficient**

February 2021

Level of motivation and discipline applied toward work

Full results: [Proficient](#)

### **Software developer fit — Proficient**

October 2023

Measures the traits that are important for successful software developers

Full results: [Proficient](#)

**Work style: Reliability — Proficient**

July 2021

Tendency to be reliable, dependable, and act with integrity at work

Full results: [Proficient](#)

**Software developer skills — Proficient**

October 2023

Designed by engineering managers and real-world employers, this test gives you hard data points to evaluate technical competency

Full results: [Proficient](#)

**Software developer fit — Proficient**

April 2022

Measures the traits that are important for successful software developers

Full results: [Proficient](#)

Indeed Assessments provides skills tests that are not indicative of a license or certification, or continued development in any professional field.
